

DAY 2, MONDAY, JUNE 5 2017

09:00 - 09:30	Opening Ceremony	
09:30 - 10:20		
Plenary Lecture	Electrochemical Engineering Time-Travel <u>A. A. Wragg</u>	25

10:20 - 11:00 Coffee Break

11:00 - 13:00	Session I - 2	
	Design and fabrication of a low-cost anode for electrolytic water disinfection <u>S. González, M. Colet-Lagrille</u>	122
	Titanium supported manganese containing electrodes for environmental applications. <u>G. Sotgiu, M. Orsini, D. Montanaro, E. Petrucci</u>	94
	Effect of titanium hydride as interlayer on the stability of Ti/Sn-Sb-Ni oxide anodes prepared by spin coating <u>M. Abbasi, S. Sandin, J. Bäckström, A. Cornell</u>	32
	The effect of Ti metal surface modification on its passivation and surface contact resistance <u>T. Bystron, M. Vesely, M. Paidar, K. Bouzek</u>	102
	Pd-Zn/C bimetallic electrocatalysts for oxygen reduction reaction <u>G. Bampos, D.I. Kondarides, S. Bebelis</u>	60
	Towards a comprehensive understanding of FeCo coated with N-doped carbon as a stable bi-functional catalyst in acidic media <u>S. H. Noh, B. C. Han</u>	31

11:00 - 13:00	Session II - 4	
	Graphite felt electrodes for vanadium redox flow battery – optimization of thermal treatment with respect to performance and durability <u>P. Mazúr, J. Mrlík, J. Pocič, J. Vrána, J. Dundálek, J. Kosek</u>	89
	Study of new electrode materials for the vanadium redox flow batteries <u>N.K. Hernandez-Sanchez, C. Ponce de Leon</u>	30
	Platinum coated porous electrodes for redox flow batteries: X-Ray tomography, mass transfer and pressure drop studies <u>L. F. Arenas, C. Ponce de León, F. C. Walsh</u>	4
	Strategies to suppress shunt currents in redox flow batteries <u>J. Pocič, J. Dundálek, M. Solík, J. Vrána, P. Mazúr, J. Kosek</u>	99

	Effect of membrane properties on performance of vanadium redox flow battery <u>J. Vrána</u> , J. Charvát, P. Mazúr, J. Pcedič, J. Dundálek, J. Kosek	101
	Capacity balancing methods for vanadium redox-flow batteries K. Schafner, T. Turek	10

13:00 - 14:00 Lunch

14:00 - 16:00	Session I - 2, 1	
	In situ monitoring the phenomenon of Electrochemical Promotion of Catalysis by synchrotron analysis A. de Lucas-Consuegra, J. Gonzalez-Cobos, J.P. Espinós, V. Rico, J.R. Sánchez-Valencia, A.R. González-Elipe, V. Perez-Dieste, C. Escudero	47
	In situ increased cathode selectivity in the hydrogen evolution reaction by addition of multivalent transitional metal compounds to the solution <u>B. Endródi</u> , 2N. Simic, M. Wildlock, A. Cornell	12
	Electrochemical oxidation of Hydroxymethylfurfural to 2,5-furandicarboxylic acid. R. Latsuzbaia, R.J.M. Bisselink, M. Crockatt, C.P.M. Roelands, E.L.V. Goetheer	96
	Development of new electrolyzers for hydrogen production from alcohols A.B. Calcerrada, A.R. de la Osa, J. Llanos, F. Dorado, J.L. Valverde, <u>A. de Lucas-Consuegra</u>	62
	Electrocatalytic hydrogenation of Cinnamaldehyde in a polymeric electrolyte membrane reactor <u>M.J. Torres</u> , A.R. De La Osa, A. De Lucas-Consuegra, J.L. Valverde, P. Sánchez	61
	Ferrates(VI) J. Híveš, K. Kerkeš, E. Kubiňáková	126

14:00 - 16:00	Session II - 4	
Keynote lecture	The electrochemical generation of hydrogen - How did it start-a historical overview <u>M.E.H. Bergmann</u>	37
	Effect of the MEA manufacturing process on the performance of PEM water electrolysis single cells with different sizes M. Paidar, T. Bystroň, K. Bouzek, <u>G. Papakonstantinou</u> , T. Vidakovic-Koch, K. Sundmacher, C. Immerz, B. Bensmann, R. Hanke-Rauschenbach	112
	Experimental analysis of a 50 cm single-channel PEM water electrolysis cell <u>C. Immerz</u> , M. Schweins, T. Bystroň, M. Paidar, B. Bensmann, K. Bouzek, R. Hanke-Rauschenbach	24
	Impact of dynamic load from renewable energy sources on PEM electrolyzer lifetime <u>F. van Berkel</u> , A.de Groot, Y. van Delft, S. ten Hoopen	22
	Improvement of gas purity in alkaline water electrolysis P. Haug, M. Koj, B. Kreitz, <u>T. Turek</u>	15

16:00 - 16:30 Coffee Break

16:30 - 18:30	Session I - 1	
	Feasibility of electro-assisted leaching of cathodes from spent lithium batteries – comparison with acid leaching P. Minois, A. Chagnes, <u>L. Svecova</u> , M.-O. Lupsea, P.-X. Thivel	120
	Electrochemical Ion Pumping for desalination and lithium recovery <u>D. Brogioli</u> , M. S. Palagonia, C. Erinmwingbovo, F. La Mantia	41
	Study of the hydrodynamic of electrochemical ion pumping for lithium recovery M.S. Palagonia, <u>D. Brogioli</u> , F. La Mantia	113
	Numerical analysis of the effect of diaphragm length, position and porosity on the electric field and mass transport inside a lithium electrolysis cell <u>E. Oliaii</u> , M. Désilets, G. Lantagneb	121
	Improving the efficiency of electrolytic remediation processes through novel strategies for the preconcentration of pollutants <u>M. Muñoz</u> , J. Llanos, C. Sáez, P. Cañizares, M.A. Rodrigo	75
	Innovative approach for the aeration of electrochemical reactors to produce hydrogen peroxide <u>J.F. Pérez</u> , J. Llanos, C. Sáez, I. Moraleda, C. López, P. Cañizares, M.A. Rodrigo	73

16:30 - 18:30	Session II - 4	
	Commercial development of the Direct Carbon Fuel Cell for Low Emission Coal <u>J. A. Allen</u> , S. W. Donne	49
	Impact of operational voltage on the Pt surface area deterioration in high temperature PEM fuel cell <u>M. Prokop</u> , R. Kodým, T. Bystron, P. Belsky, M. Paidar, K. Bouzek	39
	A 3D dynamic mathematical model of Pt-based catalyst degradation in an industrial scale HT PEM fuel cell stack <u>M. Drakselová</u> , R. Kodým, D. Šnita, K. Bouzek	84
	Development of power management and air treatment system for PEM fuel cell based mobile APU <u>J. Mališ</u> , M. Paidar, K. Bouzek	45
	Effect of number of supercapacitors directly hybridized with PEMFC on the component contribution and the performance of the system <u>D. Arora</u> , K. Gérardin, S. Raël, C. Bonnet, F. Lopicque	68
	High-efficiency in reverse electrodialysis - water electrolysis energy system <u>R. A. Tufa</u> , Jaromir Hnat, Joost Veerman, Willem van Baak, Efrem Curcio, Karel Bouzek	125

DAY 3, TUESDAY, JUNE 6, 2017

09:00 - 09:50		
Plenary Lecture	Electrokinetic Separations to Increase the Percent Solids of the Effluent from a Phosphate Mine <u>M. E. Orazem</u>	76

09:50 - 10:20 Coffee Break

10:20 - 13:00	Session I - 3	
Keynote lecture	Solar photoelectro-Fenton treatment of a mixture of parabens spiked into secondary treated wastewater effluent using low input current <u>J. R. Steter, E. Brillas, I. Sirés</u>	71
	Endogenous hormones degradation under visible light on nanotubular oxide layer grown on TiW alloys using a photocatalytic cell <u>V. M. Kaminagakura, M. E. Oliveira, R. Bertazzoli, C. Ponce de León, C. A. Rodrigues</u>	100
	Electro-peroxone: a novel advanced oxidation process for the degradation of organic pollutants <u>E. Petrucci, I. Bavasso, L. Di Palma, D. Montanaro</u>	92
	A novel eletron-Fenton system based on the highly efficient hydrogen peroxide generation reactor <u>G. B. Ren, M. H. Zhou</u>	128
	Efficiency of DMSO as hydroxyl radical probe and study of the influence of current density by reactive oxygen species monitoring in an Electrochemical Advanced Oxidation Process <u>A. Abou Dalle, L. Domergue, F. Fourcade, A. A. Assadi, H. Djelal, T. Lendormi, S. Taha, A. Amrane</u>	42
	Electrochemical treatment of poly- and perfluoroalkyl substances (PFASs) from industrial effluents <u>A. Urriaga, B. Gómez-Ruiz, S. Gómez-Lavín, N. Diban, A. Colin, V. Boiteux, X. Dauchy</u>	16
	Voltammetric study of 6:2 FTSA oxidation using BDD electrodes <u>J. Carrillo-Abad, V. Pérez-Herranz, A. Urriaga</u>	33

10:20 - 13:00	Session II - 4	
	Bifunctional air electrodes for zinc-air flow batteries <u>B. Pichler, L. Reščec, V. Hacker</u>	129
	Electrochemical energy storage for renewable energy integration: zinc-air flow batteries <u>B. Amunátegui, M. Sierra, A. Ibáñez</u>	7
	Development of aluminium-ion battery with novel intercalation materials <u>R.D. McKerracher, A.W. Holland, R.G.A. Wills, A.J. Cruden</u>	13

	A semi-empirical aging model for lithium iron phosphate electrode <u>B. Rajabloo</u> , W. Wakem, A. Jokar, M. Désilets, G. Briard	123
	The optimization of functionalized cellulosic “papers” for supercapacitor electrode applications <u>D. I. Abouelamaiem</u> , A. Jorge Sobrido, M. M. Titirici, P. R. Shearing, D. J. L. Brett	5
	Prediction of photo-anode current densities for modelling scaled-up photo-electrochemical reactors F.E. Bedoya Lora, A. Hankin, I. Gentle, <u>G.H. Kelsall</u>	98
	Doped hematite photoanodes for light assisted water electrolysis <u>J. Krýsa</u> , T. Kotrla, Š. Paušová, M. Zlámal, M. Neumann-Spallart	124
	Porous silicon electrochemically modified with polyaniline: effect of the preparation conditions on the photocurrent properties <u>S. Corgiolu</u> , A. Vacca, M. Mascia, S. Palmas, E. Sechi, L. Mais, M.V. Tiddia, G. Mula	58

13:00 - 14:20 Lunch

14:20 - 16:20	Session I - 3	
	Integration of electrochemical oxidation and nanofiltration for a more efficient treatment of perfluorohexanoic acid <u>A. Soriano</u> , D. Gorri, A. Urriaga	23
	Visualisation of pH distribution in an electrocoagulation cell using laser scanning confocal microscopy B. Fuladpanjeh-Hojaghan, M. Trifkovic, <u>E.P.L. Roberts</u>	87
	Treatment of phosphate-containing waters: electrocoagulation or chemical coagulation? <u>B. Lassoued</u> , M. Le Page Mostefa, A. Attour, F. Zaghrouba, F. Lopicque	66
	Elimination of iron by electrocoagulation with Al electrodes: fundamental investigation of the lumped phenomena involved <u>A. Doggaz</u> , M. Le Page Mostefa, A. Attour, M. Tlili, F. Lopicque	67
	Model-based assessment of the influence of electrode and spacer channel design on desalination in a membrane capacitive deionisation cell <u>F. Kubanek</u> , U. Krewer	93
	Modelling the transport of ions and water dissociation in an electrodeionization process for As(V) removal <u>E. P. Rivero</u> , A. Ortega, M. R. Cruz-Díaz, F. A. Rodríguez, I. González	114

14:20 - 16:20	Session II - 6	
Keynote lecture	Interpretation of CPE Parameters in Terms of Physically Meaningful System Properties <u>M. E. Orazem</u> , B. Tribollet, V. Vivier, M. Musiani, N. Pébère	77
	In-Situ Determination of Thickness and Electrochemical Properties of Oxide Film on Aluminium in Aqueous Solution N.-H. Giskeødegård, O. Hunderi, <u>K. Nisancioglu</u>	35

Keynote lecture	Immobilization of active molecules in nanostructured materials for multifunctional coatings <u>J. Tedim, M.G.S. Ferreira</u>	28
	Hydrogen embrittlement susceptibility test using weak alkaline solution for rebar in pre-stressed concrete <u>Y. Takeuchi, T. Kamisho, M. Watanabe, T. Sawada</u>	109
16:20 - 18:30	Poster Session with Walking Dinner	
	PEM water electrolysis: analysis of transport processes in the anodic porous transport layer <u>A. Zinser, G. Papakonstantinou, K. Sundmacher</u>	14
	Electrochemical behavior of fission products in pyro-electrochemical reduction process <u>S. M. Jeong, M.W. Lee, B. H. Park</u>	17
	Simulation of steady-state electrochemical machining by pseudotransient method <u>V.M. Volgin, V.V. Lyubimov, I.V. Gnidina, A.D. Davydov, T.B. Kabanova</u>	19
	Effect of anode shape and electrode reaction kinetics on uniformity of electrodeposition onto resistive substrates <u>V.V. Lyubimov, V.M. Volgin, V.D. Kukhar, A.D. Davydov</u>	20
	Simulation of localized electrodeposition of microwires and microtubes <u>A.D. Davydov, T.B. Kabanova, V.M. Volgin, V.V. Lyubimov, I.V. Gnidina</u>	21
	Fabrication of SnO ₂ nanoparticle film and its application in photoelectrochemical anticorrosion for stainless steel <u>J. Hu, Z. Guan, Y. Liang, H. Wang, R. Du</u>	29
	Electro-chemical generation of hydrogen peroxide under pressure using carbon felt electrodes <u>J.F. Pérez, O. Scialdone, B. Schiavo, S. Sabatino, C. Sáez, J. Llanos, C. López, P. Cañizares, M.A. Rodrigo</u>	74
	The effect of bone char on electrokinetic removal of pyrene from polluted soil <u>A. Rezaee, S. E. Hashemi</u>	34
	Study of ceramic electrodes for the removal of antibiotics in wastewater <u>J. Mora, M. García-Gabaldón, T. Droguett, E. Ortega, V. Pérez-Herranz, S. Mestre</u>	57
	Degradation of the Reactive Black 5 by electrochemical oxidation using ceramic electrode <u>T. Droguett, M. García-Gabaldón, J. Mora, E. Ortega, S. Mestre, V. Pérez-Herranz</u>	65
	Degradation of levofloxacin in a solar photoelectro-Fenton flow plant in sulfate medium <u>I. Sirés, E. Brillas, I.G. Coria, J.L. Nava</u>	72
	Photoelectrocatalytic oxidation of the fungicide carbendazim in a flow reactor using Ru-decorated TiO ₂ nanotubes <u>M. Codolo, G. P. Calobrezzi, C. A. Rodrigues</u>	103
	Synthesys of WO ₃ -modified TiO ₂ nanotubes for photoelectrocatalytic oxidation of Methyl Orange <u>L. Mais, S. Palmas, A. Vacca, M. Mascia, S. Corgiolu, E. Sechi</u>	70

On the discontinuous electrochemical chlorine formation for drinking water disinfection at low Re numbers <u>M.E.H. Bergmann</u>	40
Electrochemical ammonia removal by chlorination and air stripping <u>M. Paidar, M. Roubalík, O. Škorvan</u>	111
Optimization of the cell for capacitive deionization <u>A. Giurg, M. Paidar, O. Škorvan</u>	55
Analysis of fluid flow uniformity in the pilot-scale electrolysers as a representative of the electromembrane process unit with plate-&-frame configuration <u>R. Kodým, M. Němeček, D. Šnita, K. Bouzek</u>	115
Mass-transfer measurements of 3D Pt-Ir/Ti Electrodes in a direct borohydride fuel cell by an Electrochemical Technique <u>A. Abahussain, C. Ponce de León, F. C. Walsh</u>	130
A new flow field cell design for zinc-iodide redox flow battery <u>F. Shakeri Hosseinabad, D. Fofana, J.Li, E.P.L Roberts</u>	88
Study of electrolytes based on alkaline hydroxides for use in zinc-air fuel cells <u>O. Libánský, J. Dundálek, J. Pcedič, J. Vrána, P. Mazúr, J. Kosek</u>	81
Iron air battery: design, construction and characterisation <u>H. Figueredo-Rodríguez, R. McKerracher, C. Ponce-de-León</u>	26
Electrolytes for vanadium redox flow battery – production, characterization and stability <u>J. Charvát, P. Mazúr, J. Pcedič, J. Vrána, J. Dundálek, J. Kosek</u>	86
Monitoring the State of Charge of All-Vanadium Redox-Flow Batteries <u>C. Weidlich, L. Holtz, K.-M. Mangold</u>	79
Effect of pore size of porous glass membranes on the performance of vanadium redox flow batteries <u>H. Mögelin, A. Barascu, S. Krenkel, S. Wassersleben, D. Enke, U. Kunz,</u>	8
Optimization of synthesis conditions for preparation of Pt/C catalysts: control of structure <u>A. Alekseenko, E. Moguchih, S. Belenov, V. Menshchikov, N.Yu. Tabachkova, V. Volochaev, V. Guterman</u>	90
Improving of activity and durability of Pt-Cu/C and Pt-Co/C electrocatalysts with different structure by thermal treatment <u>S. Belenov, V. Menshchikov, S. Kirakosyan, A. Alekseyenko, V. Pryadchenko, D. Shemet, V.Volochaev, V. Guterman</u>	85
Ultra-low Pt catalyst and its application to ORR reaction <u>G. Park, M. Choun, J. Lee</u>	44
Evaluation of microbial fuel cells with graphite plus Co ₃ O ₄ paints as oxygen reduction cathode catalyst by using different producing methods and supports <u>B. Jiang, T. Muddemann, U. Kunz</u>	27

	Controlled amino-functionalization of gold surfaces by electrochemical deposition of diazonium salts S. Corgiolu, A. Vacca, M. Mascia, S. Palmas, E. Sechi, L. Mais, C. Napoli, M. Barbaro	59
	Surfactant film voltammetry of bacterial and mammalian cytochromes P450 suggests tunable, film-dependent properties A. K. Udit	52
	CO ₂ -conversion to Acids and Alcohols by Microbial Electrosynthesis M. Haberbauer, C. Hemmelmair, S. Thallner, W. Schnitzhofer	118
	Electrodeposited Cu-alloy films as catalysts for CO ₂ electroreduction A. Hovestad, R. Latsuzbaia, R.M. Meertens, E.L.V. Goetheer	82
	Electrochemical reduction of CO ₂ to liquid fuels on a different metal-incorporated bi-phasic Cu ₂ O-Cu electrode S. Lee, J. Lee	43
	Thermodynamic simulation of the H ₂ O-CO ₂ Co-Electrolysis in Solid Oxides Electrolysis Cell at High Temperatures V. Miloš, R. Kodym, P. Vágner ¹ , M. Paidar, K. Bouzek	117
	The Influence of Deposition Variables on the Physical and Electrochemical Characteristics of Carbons Synthesised through the Electrolytic Reduction of Molten Carbonate Salts M. Hughes, J. Allen, S. Donne	50
	Electrochemical synthesis of ammonia from water and nitrogen under atmospheric pressure H. Ch. Yoon, Ch.-Y. Yoo, J. N. Kim, E. Y. Jung, H. Ch. Hee	119

DAY 4, WEDNESDAY, JUNE 7, 2017

09:00 - 09:50		
Plenary Lecture	Electrochemical nano/micro fabrication and processing for functional structures, devices and materials - process development and mechanistic <u>T. Homma</u>	106

09:50 - 10:20 Coffee Break

10:20 - 12:00	Session I - 3	
	Nickel hexacyanoferrate electrodes for cation intercalation desalination <u>S. Porada</u> , P. Bukowska, A. Shrivastava, P.M. Biesheuvel, K. C. Smith	80
	Overcoming mass transfer limitations by the simultaneous electro-dialysis and electro-oxidation of 2,4-D <u>A. Raschitor</u> , J. Llanos, M. A. Rodrigo, P. Cañizares	64
	Boron doped diamond electrodes for degradation of pollutants and recovery of metals <u>C. Weidlich</u> , S. Hild, J. Schuster, K.-M. Mangold	78
	Polymedicated patients: does electrolysis remove traces of different medicines from urine? <u>S. Cotillas</u> , E. Lacasa, C. Sáez, P. Cañizares, M. A. Rodrigo	36
	Reversible electrokinetic adsorption barriers for the removal of organochlorine herbicide from spiked soils <u>S. Rodrigo</u> , C. Sáez, P. Cañizares, M. A. Rodrigo	63

10:20 - 12:00	Session II - 1	
	Kinetic modeling of the high temperature H ₂ O-CO ₂ Co-electrolysis <u>R. Kodým</u> , P. Vágner, M. Paidar, K. Bouzek	116
	An electrochemical reactor to reduce CO ₂ to valuable chemicals <u>C. I. Müller</u> , K. Ehelebe, B. Kieback, L. Röntzsch	110
	Electrochemical reduction of CO ₂ in aqueous media catalysed by copper-tin electrodes <u>S. Palmas</u> , L. Mais, A. Vacca, M. Mascia, E. Sechi, S. Corgiolu, F. Ferrara, A. Pettinau	69
	Electrochemical reduction of CO ₂ using Boron doped diamond electrodes in aqueous electrolytes <u>N. S. Romero</u> , K. Wiesner, W. Eisenreich, O. Hinrichsen, Y. Einaga, K. Nakata	9
	Production of organics compounds from CO ₂ photo-electroreduction using TiO ₂ nanotubes decorated with copper oxides nanoparticles <u>J. Almeida</u> , J. F. Brito, C. A. Rodrigues	95

12:40 - 13:00 Lunch

13:00 - 19:00 Trip / Excursion**20:00 - 23:00 Congress Dinner**

DAY 5, HURSDAY, JUNE 8, 2017

09:00 - 09:50		
Plenary Lecture	Gas diffusion electrodes in electrolysis - from chlorine manufacturing today to production of other chemicals tomorrow <u>J. Kintrup</u>	107

09:50 - 10:20 Coffee Break

10:20 - 12:20	Session I - 7	
	Electrochemical impedance spectroscopy as a technique for investigating mild steel corrosion control in seawater by organic surfactants <u>M. A. Deyab</u>	3
	Step potential electrochemical spectroscopy (SPECS): A novel way of examining the electrochemical characteristics of materials M. Hughes, <u>J. Allen</u> , S. Donne	51
	Experimental investigation of corner's form effect on the turbulence parameters sequence of square cylinder <u>A. Kargar</u>	11
	Mass transport-enhanced electrodeposition for the efficient recovery of Cu and Se from sulfuric acid solution <u>W. Jin</u>	6
	The role of electrodeposited Cu/In/Ga precursors film morphology and interdiffusion in thin film Cu(In,Ga)Se ₂ solar cell production <u>A. Hovestad</u> , H. Rendering, É.S.F. Le Calvé	83
	Photoelectrochromic windows for energy saving and power production in buildings. Recent developments and future prospects <u>G. Leftheriotis</u> , A. Dokouzis, K. Theodosiou	48

10:20 - 12:20	Session II - 5	
	Removal of organochlorinated species from soil by combined biological and electrochemical processes S. Barba, B. Carboneras, J. Villaseñor, F. J. Fernández, P. Cañizares, M. A. Rodrigo	38
	Investigation of metabolic pathways in a microbial fuel cell via process engineering methods <u>F. Kubanek</u> , U. Krewer	91
	Bioelectrode performance based on formate dehydrogenase immobilization onto mesoporous carbons for CO ₂ electrochemical reduction <u>N. Hernández-Ibáñez</u> , A. Gomis-Berenguer, C. O. Ania, V. Montiel, J. Iniesta	46
	Integrated microbial fuel cell - supercapacitor systems <u>C. Santoro</u> , F. Soavi, C. Arbizzani, A. Serov, P. Atanassov	104
	Anion selective polymer electrolytes with DABCO functional groups for advanced alkaline water electrolysis <u>J. Hnat</u> , M. Plevova, J. Zitka, M. Paidar, K. Bouzek	56
	Electrical conductivity of low temperature multicomponent cryolite based electrolytes <u>E. Kubiňáková</u> , J. Híveš, V. Danielik	127

12:30 - 13:00 Closing Ceremony

13:00 - 14:00 Lunch

March 20, 2017
