

Invitation to contribute to issue on Electrochemical Engineering

Dear participants at the 12th European Symposium in Electrochemical Engineering,

Electrochemical Science Advances will be publishing a special issue covering **Electrochemical Engineering** and related aspects, in association with the 12th European Symposium on Electrochemical Engineering, Leeuwarden, the Netherlands. It is our pleasure to invite you to submit a brief review article or research article for this collection. Your article will be fully open-access, and the fees are waived for this issue.

Electrochemical Science Advances (ELSA) is a new open-access, peer-reviewed journal co-published by **Wiley-VCH and Chemistry Europe** (chemistry-europe.org), an association of 16 chemical societies from 15 European countries. ELSA is a sister journal of *Angewandte Chemie*, *Chemistry-A European Journal*, *ChemPhysChem*, *ChemElectroChem*, and *Batteries & Supercaps*, thus guaranteeing the widest possible visibility of your article.

Manuscripts may be submitted during the period June 21 until October 31, 2021. We do appreciate that all colleagues are currently working outside their usual environments. Formal aspects and article types can be found in the [Author Guidelines](#). When you are ready to submit your research article or review article, please submit your manuscript via this address: <https://mc.manuscriptcentral.com/elsa>, and choose this special issue from the drop-down options.

It would be great to have you on board for this collection. We are looking forward to receiving your submission!

Kind regards,

Ann Cornell, KTH Royal Institute of Technology
Claudia Weidlich, DECHEMA Research Institute
Karel Bouzek, UCT Prague
